Allowable Subject Matter

Claims 1—9 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of record does not teach or suggest the claimed amounts of polymerization initiator and styrene component in Claims 1 – 9. The closest prior, JP 1-284536 to Takamasa et al., teaches amounts of initiator and styrene components outside the ranges in the instant claims. In their decision on the instant case on September 28, 2009, the Board of Patent Appeals and Interferences held that a person of ordinary skill in the art would not depart from the teachings of Takamasa et al. by optimizing the amounts of initiator and styrene originally disclosed because doing so would run counter to the direction and guidance of the reference (Pages 9 and 10).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
